

FRESKO VACUUM CONTAINERS

User manual

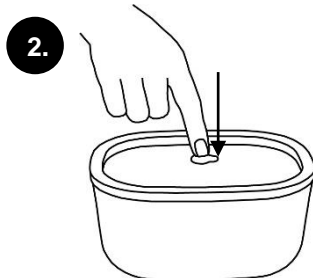

COMPOUND PARTS AND MATERIALS

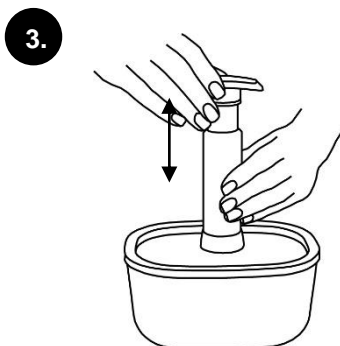

USE

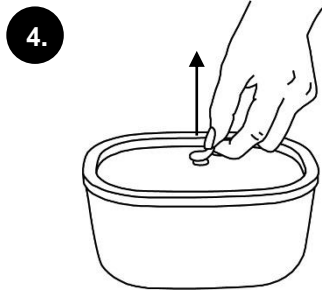

Fill the container up to 1.5 cm under the top edge. Make sure the valve is lifted and close the container.

Press the valve in flat position. The container is now airtight.

Place the pump around the valve and repeatedly pull the handle. Optimal vacuum is created when you feel slight resistance in the pump.

To open, pull the valve upwards to release vacuum and open the lid.

NOTES:

- Vacuum pack only food at room temperature or cold.
- Before first use, wash the containers and lids.
- Make sure that the edge of the container and lid are clean and dry.
- Fresko containers can be vacuum sealed with any Status' vacuum pump.

- microwave safe (max. 2 min. without the lid)
- dishwasher safe (top rack only)
- freezer safe (up to -20 °C)

Developed and produced in Slovenia, EU.
